EXPERIENCE AND REPUTATION GUARANTEE SATISFACTION

We have been manufacturing AC-KA-ME Venetian Blinds for many years and have placed them in some of the most prominent Government buildings in the country as well as in homes ranging from the simple cottage to the palatial residence.

During this period of successful operation we have sought out the best raw materials and semi-manufactured supplies necessary to the high quality standards for which AC-KA-ME Venetian Blinds are noted. Much of our hardware and other metal parts as well as the major portion of our wood work is produced in our own plant.

Unless otherwise ordered, AC-KA-ME Venetian Blinds are made of thoroughly kiln dried and selected port orford cedar slats.

MODERN FACTORY EQUIPMENT QUALITY WORKMANSHIP

Our factory is modernly equipped for the manufacture of Venetian Blinds and includes fully electrified wood-working machinery of the very best makes and designs.

Much of the special equipment required for our production has been designed and built in our plant in which we are constantly making improvements.

We have also recently purchased additional equipment of high efficiency which together with our staff of experienced and conscientious workmen enables us to offer a Venetian Blind of the highest type at a price within reach of all.

ESTABLISHED RESPONSIBILITY

Our reputation for fair dealing is well established. The quality of material used, workmanship and design of our products are unsurpassed. This together with our experience in manufacturing Venetian Blinds has resulted in hundreds and hundreds of satisfied users throughout the Southwest—enthusiastic boosters for AC-KA-ME Venetian Blinds.

DEMONSTRATION WITHOUT OBLIGATION

We are always glad to submit samples and have no hesitancy in demonstrating AC-KA-ME Venetian Blinds in competition with other makes, due to the superiority and record of our products.

For other features, and illustrations depicting the beauty of AC-KA-ME Venetian Blinds, see other pages of this folder.

AC-KA-ME

Venetian Blinds

GIVE THE HOME DISTINCTIVE CHARM

● THE decorative value of AC-KA-ME Venetian Blinds far surpasses that of any other type of window covering. Interior decorators and smart housewives employ AC-KA-ME Venetian Blinds with highly artistic effect. In addition to their distinctive charm, AC-KA-ME Venetian Blinds provide cool comfort. They let in the breeze, and yet they exclude the direct rays of the sun. Rooms may be softly shaded or brightened without glare, and to any extent desired.

Venetian Blinds are equally effective for exterior decorative purposes. They give the exterior of the house a certain character of individuality not otherwise possible. Outside as well as inside, they make the home "beautiful beyond imagination." AC-KA-ME Venetian Blinds are thus contributing to beauty and comfort in the homes of our Southland.

In any office building, hospital or club, as well as in the cottage or palatial home, AC-KA-ME Venetian Blinds are indispensable to beauty and comfort.

For added convenience we recommend "channel side guided blinds" designated as AC-KA-ME TYPE "B".

Where guides are not used sill brackets are supplied with which the blinds may be hooked down. This we designate as AC-KA-ME TYPE "A", commonly known as "Free-hanging type".

● LEFT: Sun parlor in the home of Mrs. Harold Abrams, Mercedes Street, Dallas, Texas.

ECONOMICAL AS WELL AS HIGHLY ARTISTIC

● THE association of AC-KA-ME Venetian Blinds with artistic homes often creates the impression that blinds of this type are very costly. Therefore, we are frequently asked, "How expensive are Venetian Blinds?" Obviously, the first cost—or more truly speaking, the original investment—is more than cloth shades or ordinary cheap curtains. But even the cheapest window coverings involve cleaning and replacement expense, and over a period of but a few years thus become more costly than Venetian Blinds. And if you compare Venetian Blinds with draperies of only moderate quality you will find that Venetian Blinds are less expensive.

The use of Venetian Blinds does away with unsightly cloth or wood awnings. Here again AC-KA-ME Venetian Blinds effect another worthwhile economy, at the same time providing far greater beauty.

For Colors and Features of Convenience, See Back Page

AC-KA-ME VENETIAN BLINDS

The spacious living room in residence of Ira P. DeLoache, Dallas, Texas.

Worm gear tilting bracket—standard equipment.

AC-KA-ME Venetian Blinds are not only artistic, but also thoroughly practical—simple and convenient. A pull of the cords on left side of blind adjusts slats to any desired angle by means of a worm gear device which keeps the slats in position until change is again desired.

Automatic cord stops are supplied on all AC-KA-ME Venetian Blinds.

A pull of the cord on the right hand side of the blind raises the blind to any desired position and a slight pull to the left before releasing the cord engages the stop and holds the blind in position. To lower the blind simply pull down on the cord to release the stop, then gently lower the blind to its full length or to any other position desired. A simple clasp on the cord also equalizes the pull so that the slats remain perfectly even and parallel when being raised or lowered.

A Wide Variety of Harmonious Colors

AC-KA-ME Venetian Blinds may be furnished in any of our twenty-two standard colors and twelve complementary shades of webbings. They may also be had in special color tones if desired with special color webbing.
